ROADWAY RESURFACING UPDATE – July 2022

General Roadway Construction Information
- Paving work generally occurs between 7:00 am – 5:00 pm Mon. thru Fri.
- Avoid parking on the street during roadway construction
- Access may be limited. Expect delays and seek alternate routes when possible.
- Use caution and reduce speeds when driving through the work zone and be alert for raised manhole structures
- The resurfacing project can take several weeks to complete due to utility work, contractor’s scheduling and weather.
- Please be patient while we conduct these roadway improvements.
- Contact the Public Works Department at 860-243-1487 with any questions or concerns.

July 2022 update:
- The following roadways are tentatively scheduled to be resurfaced by July 8, 2022.
  - Nolan Drive, Flyer Row and Arthur Drive
- Reclaiming of the following streets will be performed starting approx. August 15, 2022. Town staff will be performing storm drainage repairs prior to August 15th in preparation for paving.
  - Chestnut Hill Drive, Farmstead Circle, Pasture Lane, Wesleyan Terrace, Trinity Circle, Mucko Road.

- Road pulverization is the most complicated and comprehensive of all approaches to road repair. This proposed approach has several phases. These phases include the raising of storm water structures, which is currently in progress; pulverizing of the road base; base paving; curb installation; and final paving. These phases will occur in order and will be addressed by different specialty contractors. It is likely that the complete project will take several weeks after work has begun on any given street. You will notice breaks in activity between project phases.
